HERMAN RIDDER SAYS EXECUTION OF WOMAN UNNECESSARY HORROR

NEW YORK, Oct. 22.—Herman Ridder, publisher of the Staats Zeitung, an ardent champion of the German cause, deplored the execution of Miss Cavell by the Germans in Belgium. "It is a terrible thing," he said. "It seems too awful that such things must happen. It should not be necessary to execute a woman under any circumstances. Had her case been taken before the Kaiser, she probably would have been pardoned. There are times when German commanders may do things in the heat of war in which even their own people do not support them." Oscar Strauss held it to be a shocking incident.

PORTLAND SCHOOLS TO GIVE CREDITS FOR GUARD DRILL

NO DRILL IN SCHOOLS BUT O. N. G. AND NAVAL MILITIA RECOMMENDED.

PORTLAND, Ore., Oct. 22.—Despite the radical opposition of "anti-militarists," who declared that voluntary military instruction in the high schools is "un-American because military," and a measure that "was not the outgrowth of popular demand," the members of the school board adopted yesterday the recommendation offered by the teachers' committee, approving the principle of military instruction in the Portland high schools.

Enrollment of the high school students in the Oregon National Guard and the naval militia is the form of training that was unanimously agreed upon. This decision followed a canvass of the students by City Superintendent Alderman. Under the plan an adopted all the equipment, supplies and uniforms will be furnished by the government through the state. Credits to be given for drill. The students will be encouraged to enlist in the state service and will receive graduation credits in their school work for attendance at drills. The working out of this idea was placed in the hands of a committee composed of the teachers' committee, city superintendent and adjutant-general of the state.

This committee will be composed of Dr. Alan Welch Smith, S. P. Lockwood, L. R. Alderman and Adjutant-General George A. White. They will proceed with the plans immediately. O. M. Timmerman was the only member of the board who was not present and without his vote the measure passed unanimously after it had been attacked by Paul Stark Seeley and John Lloyd.

CARRANZA AFTER NORTHWEST TIES FOR PROMPT USE

GRANTING OF RECOGNITION TO DE FACTO GOVERNMENT BRINGS RESULTS.

PORTLAND, Ore., Oct. 22.—Substantial evidence that official recognition of the Carranza government in Mexico by the United States, which carries with it the privilege of shipping explosives to the Carranza forces, is being turned to good account in a commercial way, was illustrated here yesterday through the receipt by Portland lumbermen of specifications from the Carranza government covering several million feet of lumber wanted in the form of ties and stringers for railroad construction.

The destruction of certain railroad property south of the border is thought to have hampered the future movement of troops and supplies unless reconstruction material can be obtained without loss of time, and the nearest source of supply is the northwest, with the Columbia river picked as the most advantageous market. There are ties available on the river and shipments can be started with little delay if satisfactory prices are quoted the present powers that-be in Mexico.

Vessels Are Available.

The closing of the Panama canal has made it possible to use handy-sized steamers held on this side for the business and in any event the steam tonnage regularly found on the coast could be utilized in moving the stuff as desired. It is believed that the inquiry will be followed by others as progress is made in the rehabilitation of certain districts and that a good market may be offered in Mexico for lumber in advance of the complete pacification of the country.

The Southern Pacific interests are to advance certain repairs to their property where possible, and one cargo is already assured, the steamer Klamath being scheduled to load 1,050,000 feet of ties here next month for Guaymas delivery. Later the Southern Pacific undoubtedly will be in the market for ties, stringers and bridge material in connection with the announced intention of constructing a direct line to the City of Mexico.

Garrison has asked department of justice agents to assist in stamping out the bandits and the question of establishing an army secret service is under consideration. The government has in mind the creation of a "military zone" by court martial and the summary punishment of raiders.

GARY SAYS PUBLICITY WOULD END THE WAR

CLEVELAND, Oct. 22.—The pitiless light of publicity would end the great world war. Such was the stand of Chairman Elbert Gary, of the United States Steel Corporation, addressing the American Iron and Steel Institute, of which he is president. Incidentally, Gary pointed to America's prosperity—a prosperity he admitted, partially born of war—but he predicted a prolonged continuance of these conditions cannot obtain after the war, particularly if the country is laid open to competition with cheap labor and impoverished conditions abroad. The steel king took a positive stand for publicity in private business, and in state, municipal and national affairs. On the question of publicity to end the war, Gary said: "If the masses of the people of the different nations engaged in the terrible conflicts now raging in Europe were fully informed of the facts it is not to be supposed the wars would be continued long."
